REAL-WORLD SCENARIO #1

“I JUST NEEDED TO
GET MY JOB DONE.”

You need a tool to complete an assignment.

The approved software doesn't quite do what you need.

You find a free online tool.
You upload the file.

It works perfectly.

What's the problem?

CONVENIENCE ≠ AUTHORIZATION

Free doesn't mean safe.

Available doesn't mean approved.

Useful doesn't mean authorized.

When in doubt,
verify before you use it.

REAL-WORLD SCENARIO #2

“AI CAN HELP ME WITH THIS...”

You have a lengthy document to review.

You open a public AI tool.

You paste the information into the prompt.

Seconds later, you have an excellent summary.

What did you just give the AI?
