Using Avaya J169/J179 IP Phone SIP
Note
Using a cell, mobile, or GSM phone, or a two-way radio in close proximity to an Avaya IP telephone might cause interference.

Documentation disclaimer
“Documentation” means information published in varying mediums which may include product information, operating instructions and performance specifications that are generally made available to users of products. Documentation does not include marketing materials. Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of Documentation unless such modifications, additions, or deletions were performed by or on the express behalf of Avaya. End User agrees to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer
Avaya is not responsible for the contents or reliability of any linked websites referenced within this site or Documentation provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty
Avaya provides a limited warranty on Avaya hardware and software. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya’s standard warranty language, as well as information regarding support for this product while under warranty is available to Avaya customers and other parties through the Avaya Support website: https://support.avaya.com/helpcenter/getGenericDetails?detailId=C20091120112456651010 under the link “Warranty & Product Lifecycle” or such successor site as designated by Avaya. Please note that if you acquired the product(s) from an authorized Avaya Channel Partner outside of the United States and Canada, the warranty is provided to You by said Avaya Channel Partner and not by Avaya.

“Hosted Service” means an Avaya hosted service subscription that You acquire from either Avaya or an authorized Avaya Channel Partner (as applicable) and which is described further in Hosted SAS or other service description documentation regarding the applicable hosted service. If You purchase a Hosted Service subscription, the foregoing limited warranty may not apply but You may be entitled to support services in connection with the Hosted Service as described further in your service description documents for the applicable Hosted Service. Contact Avaya or Avaya Channel Partner (as applicable) for more information.

Hosted Service
THE FOLLOWING APPLIES ONLY IF YOU PURCHASE AN AVAYA HOSTED SERVICE SUBSCRIPTION FROM AVAYA OR AN AVAYA CHANNEL PARTNER (AS APPLICABLE), THE TERMS OF USE FOR HOSTED SERVICES ARE AVAILABLE ON THE AVAYA WEBSITE: HTTPS://SUPPORT.AVAYA.COM/LICENSEINFO UNDER THE LINK “Avaya Terms of Use for Hosted Services” OR SUCH SUCCESSOR SITE AS DESIGNATED BY AVAYA, AND ARE APPLICABLE TO ANYONE WHO ACQUIRES OR USES THE HOSTED SERVICE. BY ACCESSING OR USING THE HOSTED SERVICE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE DOING BUSINESS, HEREAFTER REFERRED TO INTERCHANGEABLY AS “YOU” AND “END USER”), AGREE TO THE TERMS OF USE. IF YOU ARE ACCEPTING THE TERMS OF USE ON BEHALF A COMPANY OR OTHER LEGAL ENTITY, YOU REPRESENT THAT YOU HAVE THE AUTHORITY TO BIND SUCH ENTITY TO THESE TERMS OF USE. IF YOU DO NOT HAVE SUCH AUTHORITY, OR IF YOU DO NOT WISH TO ACCEPT THESE TERMS OF USE, YOU MUST NOT ACCESS OR USE THE HOSTED SERVICE OR AUTHORIZE ANYONE TO ACCESS OR USE THE HOSTED SERVICE.

Licenses
THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE: HTTPS://SUPPORT.AVAYA.COM/LICENSEINFO UNDER THE LINK “AVAYA SOFTWARE LICENSE TERMS (Avaya Products)” OR SUCH SUCCESSOR SITE AS DESIGNATED BY AVAYA, ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AVAYA CHANNEL PARTNER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AVAYA CHANNEL PARTNER, UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA CHANNEL PARTNER, AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS “YOU” AND “END USER”), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE (“AVAYA”).

Avaya grants You a license within the scope of the license types described below, with the exception of Heritage Nortel Software, for whom the scope of the license is detailed below. Where the order documentation does not explicitly identify a license type, the applicable license will be a Designated System License as set forth below in the Designated System(s) License (DS) section as applicable. The applicable number of licenses and units of capacity for which the license is granted will be one (1), unless a different number of licenses or units of capacity is specified in the documentation or other materials available to You. “Software” means computer programs in object code, provided by Avaya or an Avaya Channel Partner, whether as stand-alone products, pre-installed on hardware products, and any upgrades, updates, patches, bug fixes, or modified versions thereto. “Designated Processor” means a single stand-alone computing device. “Server” means a set of Designated Processors that hosts (physically or virtually) a software application to be accessed by multiple users. “Instance” means a single copy of the Software executing at a particular time: (i) on one physical machine; or (ii) on one deployed software virtual machine (“VM”) or similar deployment.

License types
Designated System(s) License (DS). End User may install and use each copy or an Instance of the Software only: 1) on a number of Designated Processors up to the number indicated in the order; or 2) up to the number of Instancess indicated in the order, Documentation, or as authorized by Avaya in writing. Avaya may require the Designated Processor(s) to be identified in the order by type, serial number, feature key, Instance, location or other specific designation, or to be provided by End User to Avaya through electronic means established by Avaya specifically for this purpose.

Shrinkwrap License (SR). You may install and use the Software in accordance with the terms and conditions of the applicable license agreements, such as “shrinkwrap” or “clickthrough” license accompanying or applicable to the Software (“Shrinkwrap License”).

Heritage Nortel Software
“Heritage Nortel Software” means the software that was acquired by Avaya as part of its purchase of the Nortel Enterprise Solutions Business in December 2005. The Heritage Nortel Software is the software contained within the list of Heritage Nortel Products located at https://support.avaya.com/LicenseInfo under the link “Heritage Nortel Products” or such successor site as designated by Avaya. For Heritage Nortel Software, Avaya grants Customer a license to use Heritage Nortel Software provided hereunder solely to the extent of the authorized activation or authorized usage level, solely for the purpose specified in the Documentation, and solely as embedded in, for execution on, or for communication with Avaya equipment. Charges for Heritage Nortel Software may be based on extent of activation or use authorized as specified in an order or invoice.
Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Hosted Service, or hardware provided by Avaya. All content on this site, the documentation, Hosted Service, and the product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Virtualization

The following applies if the product is deployed on a virtual machine. Each product has its own ordering code and license types. Unless otherwise stated, each Instance of a product must be separately licensed and ordered. For example, if the end user customer or Avaya Channel Partner would like to install two Instances of the same type of products, then two products of that type must be ordered.

Third Party Components

“Third Party Components” mean certain software programs or portions thereof included in the Software or Hosted Service may contain software (including open source software) distributed under third party agreements ("Third Party Components"), which contain terms regarding the rights to use certain portions of the Software ("Third Party Terms"). As required, information regarding distributed Linux OS source code (for those products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the products, Documentation or on Avaya’s website at: https://support.avaya.com/Copyright or such successor site as designated by Avaya. The open source software license terms provided as Third Party Terms are consistent with the license rights granted in these Software License Terms, and may contain additional rights benefiting You, such as modification and distribution of the open source software. The Third Party Terms shall take precedence over these Software License Terms, solely with respect to the applicable Third Party Components to the extent that these Software License Terms impose greater restrictions on You than the applicable Third Party Terms.

The following applies only if the H.264 (AVC) codec is distributed with the product. THIS PRODUCT IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO (I) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (II) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION FOR H.264 (AVC) AND H.265 (HEVC) CODECS MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE HTTP://WWW.MPEGLA.COM.

Compliance with Laws

You acknowledge and agree that it is Your responsibility for complying with any applicable laws and regulations, including, but not limited to laws and regulations related to call recording, data privacy, intellectual property, trade secret, fraud, and music performance rights, in the country or territory where the Avaya product is used.

Preventing Toll Fraud

“Toll Fraud” is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company’s behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention

If You suspect that You are being victimized by Toll Fraud and You need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-843-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: https://support.avaya.com or such successor site as designated by Avaya.

Security Vulnerabilities

Information about Avaya’s security support policies can be found in the Security Policies and Support section of https://support.avaya.com/security.

Suspected Avaya product security vulnerabilities are handled per the Avaya Product Security Support Flow (https://support.avaya.com/css/P8/documents/100161515).

Downloading Documentation

For the most current versions of Documentation, see the Avaya Support website: https://support.avaya.com, or such successor site as designated by Avaya.

Contact Avaya Support

See the Avaya Support website: https://support.avaya.com for product or Hosted Service notices and articles, or to report a problem with your Avaya product or Hosted Service. For a list of support telephone numbers and contact addresses, go to the Avaya Support website: https://support.avaya.com (or such successor site as designated by Avaya), scroll to the bottom of the page, and select Contact Avaya Support.

Regulatory Statements

Australia Statements

Handset Magnets Statement:

![Danger: The handset receiver contains magnetic devices that can attract small metallic objects. Care should be taken to avoid personal injury.]

Industry Canada (IC) Statements

RSS Standards Statement
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:

1. L’appareil ne doit pas produire de brouillage, et
2. L’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

Radio Transmitter Statement

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of type and maximum (or less) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that necessary for successful communication.

Conformément à la réglementation d’Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d’un type et d’un gain maximal (ou inférieur) approuvé pour l’émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l’intention des autres utilisateurs, il faut choisir le type d’antenne et son gain de sorte que la puissance isotrope rayonnée équivalente ne dépasse pas l’intensité nécessaire à l’établissement d’une communication satisfaisante.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-033 du Canada.

Radiation Exposure Statement

This equipment complies with FCC & IC RSS102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet équipement est conforme aux limites d’exposition aux rayonnements ISEDétails pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

Japan Statements

Class B Statement

This is a Class B product based on the standard of the VCCI Council. If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

この装置は，クラスB情報技術装置です。この装置は，家庭環境で使用することを目的としていますが，この装置がラジオやテレビジョン受信機に接近して使用されると，受信障害を引き起こすことがあります。

取扱説明書に従って正しい取り扱いをして下さい。VCCI-B

Denan Power Cord Statement

Danger:

Please be careful of the following while installing the equipment:

• Please only use the connecting cables, power cord, and AC adapters shipped with the equipment or specified by Avaya to be used with the equipment. If you use any other equipment, it may cause failures, malfunctioning, or fire.

• Power cords shipped with this equipment must not be used with any other equipment. In case the above guidelines are not followed, it may lead to death or severe injury.

警告

本製品を安全にご使用頂くため，以下のことにご注意ください。

• 接続ケーブル，電源コード，ACアダプタなどの部品は，必ず製品に同梱されております添付品または指定品をご使用ください。添付品指定品以外の部品をご使用になると故障や動作不良，火災の原因となることがあります。

• 同梱されております付属の電源コードを他の機器には使用しないでください。上記注意事項を守らないと，死亡や大怪我など人身事故の原因となることがあります。

México Statement

The operation of this equipment is subject to the following two conditions:

1. It is possible that this equipment or device may not cause harmful interference, and
2. This equipment or device must accept any interference, including interference that may cause undesired operation.

La operación de este equipo está sujeta a las siguientes dos condiciones:

1. Es posible que este equipo o dispositivo no cause interferencia perjudicial y
2. Este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

Power over Ethernet (PoE) Statement

This equipment must be connected to PoE networks without routing to the outside plant.

U.S. Federal Communications Commission (FCC) Statements

Compliance Statement

The changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

To comply with the FCC RF exposure compliance requirements, this device and its antenna must not be co-located or operating to conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interferences that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designated to provide reasonable protection against harmful interferences in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interferences to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

**Radiation Exposure Statement**
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 8 in or 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**ENERGY STAR® compliance statement**

![ENERGY STAR logo]

As an ENERGY STAR partner, Avaya Inc. has determined that this product meets the ENERGY STAR guidelines for energy efficiency. Information on the ENERGY STAR program can be found at [www.energystar.gov](http://www.energystar.gov). ENERGY STAR and the ENERGY STAR mark are registered trademarks owned by the U.S. Environmental Protection Agency.

**EU Countries**
This device when installed complies with the essential requirements and other relevant provisions of EMC Directive 2014/30/EU and LVD Directive 2014/35/EU. A copy of the Declaration may be obtained from [http://support.avaya.com](http://support.avaya.com) or Avaya Inc., 4655 Great America Parkway, Santa Clara, CA 95054–1233 USA.

**WiFi transmitter**
- Frequencies for 2412-2472 MHz, transmit power: 17.8 dBm
- Frequencies for 5180-5240 MHz, transmit power: 19.14 dBm

**General Safety Warning**
- Use only the Avaya approved Limited Power Source power supplies specified for this product.
- Ensure that you:
  - Do not operate the device near water.
  - Do not use the device during a lightning storm.
  - Do not report a gas leak while in the vicinity of the leak.

**Trademarks**
The trademarks, logos and service marks (“Marks”) displayed in this site, the Documentation, Hosted Service(s), and product(s) provided by Avaya are the registered or unregistered Marks of Avaya, its affiliates, its licensors, its suppliers, or other third parties. Users are not permitted to use such Marks without prior written consent from Avaya or such third party which may own the Mark. Nothing contained in this site, the Documentation, Hosted Service(s) and product(s) should be construed as granting, by implication, estoppel, or otherwise, any license or right in and to the Marks without the express written permission of Avaya or the applicable third party.

Avaya is a registered trademark of Avaya Inc.

All non-Avaya trademarks are the property of their respective owners. Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.

**Device Usage Consent**
By using the Avaya device you agree that Avaya, from time to time, may collect network and device data from your device and may use such data in order to validate your eligibility to use the device.

Chapter 1: Introduction

Purpose

This document describes the features of Avaya J169/J179 IP Phones and the procedures how to set them up. This document is intended for end users.
Chapter 2: Phone overview

Avaya J169/J179 IP Phone is a SIP-based phone for business communications. The phone can support up to three button modules, and each button module supports 24 call appearances.

Avaya J169 IP Phone has a grayscale display, and Avaya J179 IP Phone has a color display.

Physical specifications

- Eight call appearances
- 320 x 240 pixels graphical LCD
- Four soft keys
- Dual 10/100/1000 network ports
- Optional 5V DC Power support
- 48V GSPPoE power adapter support
- Magnetic Hook Switch
- Button module support
<table>

**Optional components**

You can use the following optional components with the phone:

- 5V DC Power adapter
- JBM24 Button Module
- Avaya J100 Expansion Module
- GSPPoE - Avaya 48V PoE power inserter
Chapter 3: Getting started

Entering the file server address

About this task
Use this procedure to enter the file server address if the phone prompts. The phone might prompt you, for example, when you connect to the network for the first time.

Before you begin
Obtain the file server address from the system administrator.

Procedure
1. To open the Auto Provisioning screen, press one of the following:
   • **Yes**: To connect to the DES server.
   • **No**: To connect to the DHCP server.

   In case of a time out, the phone selects **Yes**.

2. (Optional) If the DES server does not provide the file server address, the phone queries the DHCP server for it.

3. (Optional) If the DHCP server does not provide the file server address, the phone displays the Enter the file server address screen.

4. Press one of the following:
   • **Config**: To enter the file server address.
   • **Never**: To never prompt for the file server address.
   • **Cancel**: To cancel the prompt and display the Login screen.

5. In the **Address** field, enter the file server address.

   The address can be in the form of a numerical IP address or an alphanumeric Fully Qualified Domain Name (FQDN).

   **Tip**:
   To enter the dot symbol (.) in the field, press the alphanumeric soft key to toggle to the alphanumeric mode.

6. Press **Save**.

   The phone restarts.
Logging in to your phone

Before you begin
Ensure that your administrator assigns you with the extension and the password.

Procedure
1. On the Login screen in the Username field, type your extension.
2. Press Enter.
3. In the Password field, type your password.
4. Press Enter.

Locking and unlocking the phone

About this task
Use this procedure to lock your phone to prevent the use of the phone when you are away. Locking your phone does not log you out, so you can make emergency calls and receive calls.

Procedure
• To lock the phone, press Main menu, and select Applications > Lock.
• To unlock the phone, press Unlock and enter the login password.

Logging out of your phone

About this task
Use this procedure to log out of your primary or guest user extension.

Note:
After a guest user logs out, the primary user will be logged in.

Procedure
1. Press Main menu.
2. Scroll to Applications, and press Select.
4. In the confirmation window, press Log Out.

Using a Guest Login on page 74
Chapter 4: Navigation

Cursor navigation

You can use the navigation cluster for cursor movement or selection of options on the Phone screen or in other menus. The navigation cluster has the following keys on the phone:

- Left Arrow
- Right Arrow
- Up Arrow
- Down Arrow
- OK

Related links
Navigation cluster on page 19

Navigation cluster

The effect of pressing a navigation key depends on the current application and context.

</tr>
<tr>
<td></td>
<td>If there are two or more pages of soft keys, the OK key is active only when the phone screen displays the first page of soft keys.</td>
</tr>
</tbody>
</table>
Text input

You can use the dial pad or the text input soft keys to edit and enter text in the text input fields of the phone.

Input field

Depending on the application and context, a text input field is a text box with a label. The user interface displays labels on the left side of the text box or in the line preceding the text box. An input field can be blank or display a current value that can be modified. The user interface displays input cursors on the right side of the current value or, if the input field is blank, on the left side of the text box.

Hint text

Depending on the application and context, a text box contains hint text. The user interface displays hint text on the left side of the text box in grey, italic font. The interface replaces the hint text with the actual text that you enter. The interface displays the hint text again when you clear the entered text. The interface does not display the hint text if the field contains a value.

Text truncation

When the space in the input area cannot display the full current value, the user interface truncates the text. The interface truncates the text from the left side and displays a blank space with a cursor on the right side of the input field for a new entry. When you enter a new character, the interface truncates the existing character from the left side of the display.

Active language text direction

When the text direction of the active language is right-to-left, the text entry rules are reversed. The user interface:

- Displays the hint text on the right side of the text box.
- Displays the input cursor on the left side of the current character or, if the input field is blank, on the right side.
- Displays the new character on the left side of the current character.
- Deletes the character on the right side of the cursor when you press Backspace.

Line keys

The line keys are context-sensitive. When you press a line key:

- In full-width lists, the user interface selects the corresponding line or the object.
- In half-width lists, the interface selects the list item adjacent to the key.
Input line

The following actions take place when you press the line key against the input lines.

- Selects the corresponding line for the line which accepts user input.
- Displays the cursor after the last character of the existing content if the line is an input line. If an input line is selected, the interface performs no action even if the cursor is in the middle of the line.
- Performs the action of the first soft key for the line which does not accept user input even if the line is already selected.

For example, when you press a line key in Contacts, the interface initiates a call to the contact because the first soft key represents the Call key.

There are few exceptions on the Phone screen. For example, by pressing a line key you cannot hold a call even if Hold is the first soft key.

Main menu

The following table lists the Main menu icons used in Avaya J169/J179 IP Phones:

<table>
<thead>
<tr>
<th>Icons</th>

Chapter 5: Call operations

Handling outgoing calls

Making a call by using the dial mode

About this task
Use this procedure to make a call without lifting the handset or pressing Speaker.

Procedure
Set the dial mode on the phone to one of the following:

• **Auto**: Dial the number
  The phone starts the call when the inter digit timer times out.

• **Manual**: Dial the number, and press the Call soft key.

Related links
Setting the dialing mode on page 76

Making a call without using the dial mode

Procedure
1. Do one of the following:
   • Lift the handset.
   • Press Speaker.
   • Press Headset.
2. Dial the number.

Redialing a number

Before you begin
Ensure that the call history is not empty.
**Procedure**

1. Press **Redial**.
   The phone dials the most recently dialed number.

2. *(Optional)* To see the list of dialed numbers:
   a. Scroll to the number you want to redial.
   b. Press one of the following:
      • **Call**
      • **OK**

**Related links**
- [Setting redial options](#) on page 77

---

**Making a call by using speed dial**

**Before you begin**
Ensure you have speed dial numbers assigned to your contacts.

**Procedure**
Press and hold the dial pad key assigned to the number you want to call.

**Related links**
- [Assigning speed dial entries](#) on page 78

---

**Making a call from the local Contacts list**

**Procedure**

1. Press **Contacts**.
2. Scroll to the contact you want to call.
3. *(Optional)* Press the digits on the dial pad that correspond to the letters of the name of the person you want to call.
   For example, press 76484 to search for someone whose name is Smith.
4. Press **Call**.

---

**Making a call from the corporate database Contacts list**

**About this task**
Use this procedure to make a call from the corporate database Contacts list. This feature is available only in the Avaya Aura® environment.
Procedure

1. Press **Contacts**.
2. Press **Search**.
3. Enter the digits on the dial pad that correspond to the name of the person you want to call.
   - For example, press 76484 to search for someone whose name is Smith.
4. Press **Search** again.
   - The phone displays the contact saved in the corporate database.
5. Press **Call**.

Making an international call

Procedure

1. Press and hold the 0 key to enter the plus sign (+).
2. Dial the number that you want to call.

Emergency call

Emergency calling is used to connect to a preset emergency services number. The emergency service number is configured by the administrator.

You can make an emergency call from the following screens:

- Login screen
- Phone screen
- Lock screen

In the IP Office environment, you can make an emergency call only when you are logged in to your phone.

If your system administrator configures emergency calling for your phone, the Phone screen displays the **Emerg** soft key.

Using the **Emerg** soft key, you can dial only the number that is given the highest priority by the system administrator. Alternatively, you can dial the emergency numbers by using the dial pad in the following cases:

- The **Emerg** soft key is unavailable.
- The **Emerg** soft key is available, but you want to dial an emergency number that is not set by the system administrator.

In the IP Office environment, the **Emerg** soft key is unavailable. You must dial the emergency number by using the dial pad.
Making an emergency call

Before you begin

Ensure that the Emerg soft key is assigned by your administrator.

Procedure

Do one of the following:

• On the Phone screen, press the Emerg soft key, and again press Emerg when the phone prompts you for confirmation.
• Dial the emergency number by using the dial pad.

Handling incoming calls

Answering a call

About this task

Use this procedure to answer a call. When you receive a call, the phone does the following:

• Generates audio-visual alerts.
• Displays the caller’s name or number.

Note:

When the Incoming call pop-up window is displayed, the only visual alert is the flashing beacon LED. If you press Ignore, both the beacon LED and line key LED start flashing.

Procedure

Do one of the following:

• Lift the handset.
• Press Speaker.
• Press OK.
• Press the Answer soft key.
• Press Headset.

You cannot answer Call Park calls using the Bluetooth headset. The headset does not play an alert tone for these calls.
Answering a call when on another call

About this task
You can receive a call on a secondary call appearance only if the call appearance is free.

Procedure
Press one of the following:
• The Answer soft key
• OK
The phone puts the first call on hold and moves to the second call.

Handling calls and conferences using Multiple Device Access

Before you begin
Ensure that the system administrator has activated the Multiple Device Access feature (MDA) for your extension.

Procedure
1. Initiate a call from your phone.
2. To transfer the call to another phone, press Bridge on your phone.
   The bridged call appears on the second MDA phone. The Limited Service icon might appear briefly if your MDA phone joining the call has a different signaling mode address family. This will disappear automatically after the MDA phone joining the call switches and starts using the existing calls signaling mode address family.

Adding a participant to no hold conference on page 59
Multiple Device Access on page 56

Ignoring a call

About this task
Use this procedure to ignore an incoming call alert. If you want to ignore a call while you are on a call, use the Up and Down Arrow keys to select the call and then answer it.

Procedure
On the Incoming call screen, press one of the following:
• Ignore soft key
Call related features

Muting and unmuting a call

Procedure
1. To mute an active call, press **Mute**.
   The **Mute** button is lit.
2. To unmute the call, press **Mute** again.

   ✪ Note:
   If you mute an active call on the phone, unmute it using the **Mute** button. If you mute the call on the Bluetooth headset, unmute it on the headset.

Placing a call on hold and resuming the call

Procedure
1. To put an active call on hold, press **Hold**.
2. To resume the call, press **Resume** or **Hold**.

Managing Contacts

Adding a new contact

About this task
Use this procedure to add a contact to the phone. You can save up to 250 contacts.

Procedure
1. Press **Contacts**.
2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.

3. Do one of the following:
   • If your Contacts list is empty, press New.
   • If your Contacts list is not empty, press More > New.

4. Use the dial pad to enter the contact’s first and last name in the corresponding fields.
   • Press the number key that corresponds to the letter or number that you want to enter.
   • If the characters are on the same key, pause before entering the next character.
   • To enter a space, press 0.
   • Enter the remaining letters or numbers.
   • To enter a symbol, press More > Symbol. Use the navigation arrows to highlight the symbol that you want to enter and press Insert.
   • To delete the last character, press the Bksp soft key.

5. Enter the extension.

   The contact extension can include uppercase and lowercase letters, numbers 0 - 9, and special symbols, such as comma (,), plus (+), and dot (.)

6. Press Save.

Related links
   Adding a contact to the local group on page 35

Adding a contact from the Recents list

About this task
   Use this procedure to add a number to your Contacts list from your call history.

Procedure
   1. Press Recents.
   2. Scroll to the required number, and press +Contacts.
   3. In the First Name and Last Name fields, type the relevant information.

   The phone assigns the extension number to Last name. You can remove the extension number from this field and add other information.

   4. Press Save.

Editing a contact

Procedure
   1. Press Contacts.
2. **(Optional)** To navigate through **Main menu**, do the following:
   a. Scroll to **Applications**, and press **Select**.
   b. Scroll to **Contacts**, and press **Select**.
3. Select the contact.
4. Press **Details > Edit**.
5. Scroll to the field to edit.
6. Use the dial pad and soft keys to change the contact information.
7. Press **Save**.

### Doing a quick search for a contact

**About this task**

Using the Quick Search feature of the phone, you can quickly search for a saved contact from the Contacts list without entering the entire name of the contact.

**Before you begin**

Ensure that at least one contact is available in the Contacts list.

**Procedure**

1. Press **Contacts**.
2. **(Optional)** To navigate through **Main menu**, do the following:
   a. Scroll to **Applications**, and press **Select**.
   b. Scroll to **Contacts**, and press **Select**.
3. Press the key corresponding to the first letter of the first or last name of the contact on the dial pad.

**Result**

The phone displays all the contacts whose first or last name begins with the letter associated with the pressed key.

### Viewing the contact details

**About this task**

Use this procedure to view the details of a contact. You can call, edit, or delete a contact from the Details window.

**Before you begin**

You must have at least one contact in the Contacts list.

**Procedure**

1. Press **Contacts**.
2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.
3. Select the contact that you want to view.
4. Press Details.
   - To call the contact, press Call.
   - To edit the contact, press Edit.
   - To delete the contact, press Delete.
   - To view more options, press More.

Searching for a contact

About this task
Use this procedure to search contacts from the local Contacts list, Enterprise or Group directories.

Procedure
1. Press Contacts.
2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.
3. Press Search > More > Sources.
4. In Contact sources, press Toggle for the required directory.
5. Press Save.
6. Use the dial pad to enter the name, and press Search.
7. (Optional) To add the contact to the local Contacts list, press +Contacts.

Combining contacts

About this task
Use this procedure to merge the phone number of the current contact with the existing local contact.

Before you begin
Ensure the Contacts list is not empty.

Procedure
1. Press Contacts.
2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
b. Scroll to **Contacts**, and press **Select**.

3. Scroll to the contact that you want to combine, and press **Details > More > Combine**.
   The select mode displays the Contacts list without the current content.

4. To combine the current contact, scroll to the existing contact, and press **Select**.
   The current contact will be deleted from the Contacts list and merged with the local contact.

**Deleting a contact**

**Procedure**

1. Press **Contacts**.
2. (Optional) To navigate through **Main menu**, do the following:
   a. Scroll to **Applications**, and press **Select**.
   b. Scroll to **Contacts**, and press **Select**.
3. Select the contact to delete.
4. Press **Details > More > Delete**.
5. Press one of the following:
   - **Delete**: To delete the contact.
   - **Cancel**: To cancel the action.

**Creating a local Contacts group**

**Procedure**

1. Press **Contacts**.
2. (Optional) To navigate through **Main menu**, do the following:
   a. Scroll to **Applications**, and press **Select**.
   b. Scroll to **Contacts**, and press **Select**.
3. Press **Groups**.
4. Press **New Group**.
5. In the **Enter group name** field, type your group name.
6. Press **Save**.

**Adding a contact to the local group**

**Before you begin**

- Ensure that your Contacts list is not empty.
- Create minimum one local group to add your contacts.
Procedure

1. Press Contacts.

2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.

4. Select the group, and press +Members.

5. Scroll to the contact you want to add, and press Add.

6. (Optional) To add more contacts, repeat Steps 4 and 5.

Removing a contact from the local group

Before you begin

Ensure that you have at least one user added to your Contacts list group.

Procedure

1. Press Contacts.

2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.

4. Scroll to the group, and press Members.

   The phone displays the list of contacts in the group.

5. Select a contact, and press Remove.

   The contact will be removed from your Contacts list.

Assigning a ringtone to a contact

About this task

Use this procedure to assign a ringtone to a contact. You can assign a ringtone only to a contact that is saved in the Contacts list.

Procedure

1. Press Contacts.

2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
b. Scroll to Contacts, and press Select.

3. Select the contact, and press Details.

4. Scroll to the active ringtone, and press Edit.
   The Phone screen displays the Select ringtone window.

5. Scroll down to the ringtone that you want to assign, and press Select.

6. (Optional) To play the ringtone, press Play.

7. Press Save.

Managing conference calls

Adding a person to an active call

About this task
Use this procedure to add participants to an active call to set up a conference call.

Before you begin
Start a call.

Procedure
1. During a call, on the Phone screen, press More > Conf.
   The phone puts the existing call on hold.

2. To make a call to a participant, do one of the following:
   • Dial the phone extension by using the dial pad.
   • Call the person from the Contacts list or the Recents list.
   • Redial the last dialed number by using the Redial soft key.

3. When the third participant answers the call, press the Join soft key.

4. To add another person, press Add and repeat Steps 2 and 3.

Adding a person on hold to a conference call

Procedure
1. On the Phone screen, select your active call.

2. Press Conf or Add if you are already in a conference.

3. Select the call on hold that you want to add to the conference.

4. Press Resume to take the call off hold.

5. Press one of the following:
   • Join
Putting a conference call on hold and resuming a call

About this task
Use this procedure to put a conference participant on hold, while other participants continue the conference call.

Procedure
1. Press Hold during a conference call.
2. Do one of the following:
   • Press Resume.
   • Select the call appearance to resume the conference call.

Dropping the last participant from a conference call

About this task
You can use this procedure to disconnect the last participant who joined the conference. You cannot disconnect other participants after you disconnect the last participant. You can use this method to disconnect a participant again after you add another participant.

Procedure
1. From the Phone screen, select your active conference call.
   You will see the More soft key.
2. Press More > Drop when the conference is active.

Result
The phone drops the last participant from the conference.

Viewing the details of a conference

About this task
Use this procedure to view the details of the participants on a conference call.
If you cannot, it might be due to the server on which your extension is configured. Contact your system administrator.

Procedure
1. On the Phone screen, select your active call.
2. Press Conf.
3. Do one of the following:
   • Dial the telephone number.
   • Call the person from the Contacts list.
   • Call the person from the Recents list.
4. When the person answers, press Join or OK to add the person to the existing call.
5. Press Add and repeat the steps to add another person to the conference.
6. Press the Details button to access the details of the participants.

Managing call history

Making a call from call history
Procedure
1. Press Recents.
2. Use the Up and Down Arrow keys to select the contact that you want to call.
3. Press Call.

Viewing call history details

About this task
In Call history, you can view the following details of each call:
   • Incoming call icon
   • Outgoing call icon
   • Missed call icon
   • Call type (incoming, outgoing, missed)
   • Name
   • Extension number
   • Time
   • Date
   • Duration

Procedure
1. Press Recents.
2. (Optional) To navigate through Main menu, scroll to the following:
   b. Recents, and press Select.
3. Select the call that you want to view.
4. Press **Details**.
   The phone displays the details of the selected call.

### Deleting a call record from call history

#### Procedure

1. Press **Recents**.
2. **(Optional)** To navigate through **Main menu**, scroll to the following:
   a. **Applications**, and press **Select**.
   b. **Recents**, and press **Select**.
3. Select a number that you want to delete.
4. Press **Details**.
5. Press **Delete**.
6. Select one of the following when the phone prompts for confirmation:
   - **Delete**: To delete the entry.
   - **Cancel**: To cancel and return to the previous menu.

### Clearing the Recents list

#### Procedure

1. Press **Recents**.
2. **(Optional)** To navigate through **Main menu**, scroll to the following:
   a. **Applications**, and press **Select**.
   b. **Recents**, and press **Select**.
3. Press **Delete**.
4. Select one of the following when the phone prompts for confirmation:
   - **Delete**: To delete all entries.
   - **Cancel**: To cancel and return to the previous menu.
Chapter 6: Advanced features

Features
You can access advanced features available on your phone from the Features screen. Additionally, you can access some advanced features from the Applications screen.

Most of the features are configured by the system administrator, but some features can be configured on the phone.

For models with LEDs, the LED next to the feature name indicates whether the feature is currently on or off. If the green LED is on, the feature is on. If the red LED is on, the feature is off.

Accessing the Features screen
About this task
Use this procedure to gain access to the Features screen.

Procedure
1. Press Main menu, and scroll to Features.
2. Press Select.
3. Scroll to see the features that are configured for your extension.

Making a priority call
About this task
Use the Priority Calling feature to provide a special type of internal call alerting for the users. The called party hears a distinctive ringing when the calling party uses Priority Calling.

Procedure
1. Before dialing, gain access to the Features screen.
2. If necessary, scroll down to Priority Call, and press OK, or just press the corresponding line button.
3. Enter the extension you want to call.
4. Press **Enter** or **OK** to immediately start dialing the priority call to the extension where the call appearance will show the incoming call as a priority call.

---

**Retrieving a voice message**

**About this task**
Use this procedure to listen to your voicemail messages.

**Before you begin**
- Ensure that the system administrator configures the voicemail for your extension.
- Obtain the user ID and password of your voicemail from your system administrator.

**Procedure**
1. To log in to your voicemail, press the **Message** button.
2. Follow the voice prompts to playback your voice messages.

---

**Automatic Callback**

With the Automatic Callback feature, you receive a notification call to connect with the available extension number that was previously busy, unanswered, on another call, or out of coverage.

**Setting up Automatic Callback**

**About this task**
Use this procedure to get a notification call when your previously unanswered extension becomes available. You must use this feature only when your call is unanswered.

**Before you begin**
Ensure that the feature is activated by your system administrator.

**Procedure**
1. Press **Main menu**, and scroll to **Features**.
2. Press **Select**.
3. Scroll to **Automatic Callback**, and press **Select**.
   
   When you end the callback call, the phone deactivates the feature automatically.

---

**Call Parking**

With the Call Parking feature, you can put an active call on hold and resume the call from any other phone in your organization. The administrator must activate this feature in your phone to
park a call in your extension. You can dial your extension number from any other phone to retrieve the call.

Parking a call

About this task
Use this procedure to park an active call on your phone extension.

Before you begin
Ensure that you are on a call.

Procedure
1. Press Main menu.
2. Scroll to Features, and press Select.
3. Scroll to Park Call, and press Select.

Unparking a call

About this task
Use this procedure to unpark the call from another phone.

Before you begin
Ensure that you have parked a call on your extension.

Procedure
1. Press Main menu.
2. Scroll to Features, and press Select.
3. Scroll to Unpark Call, and press Select.
4. Enter your phone extension number.
5. Press Select.

Crisis alert station

In a work group, when any user calls an emergency number, all the crisis alert watchers receive an audio and visual alert on their IP Phones. Any of the crisis alert watchers can see the emergency caller information and attend to the person or take the required action.

The system administrator configures the crisis alert feature in one of the following modes:

- Single user mode: After any one of the crisis alert watcher acknowledges the crisis, the alerting at all the other watcher’s IP Phones stops.
- Every user mode: Each crisis alert watcher acknowledges the crisis for the alerting to stop at their respective IP Phone.
Notifying crisis alert watchers

About this task
During any crisis alert, the crisis alert watchers receive the following types of alerts:

• Crisis alert view: A toast displays the emergency caller name and the call origination extension.
• Audio alert: An alert tone plays continuously until the watcher acknowledges it.
• Visual alert: The feature LED blinks in green color.

Note:
If the phone of a crisis alert watcher is in reboot or logout state during a crisis alert, then the phone receives the alerts as following:

• In single user mode: The phone receives the alerts after the reboot or login, if the alert is not already acknowledged by any other crisis alert watcher.
• In every user mode: The phone receives the alerts after the reboot or login.

Acknowledging the crisis alert

About this task
During a crisis alert the phone plays the alert tone, the LED flashes, and the screen displays the emergency caller information.

Before you begin
Ensure that your system administrator designates you as a crisis alert watcher.

Procedure
1. The Phone screen displays the emergency caller name and extension.
2. Press OK.
3. The Phone screen displays the details of emergency caller.
   If there is a new crisis alert while you are viewing the details of the current alert, then the phone plays the alert tone again. To view the new crisis alert details, press Back.

Acknowledging the crisis alert when the phone is locked

About this task
During a crisis alert if the phone is locked, the phone alerts the crisis alert by playing the alert tone, the LED flashes, and the screen displays the emergency caller information.

Before you begin
Ensure that your system administrator designates you as a crisis alert watcher.

Procedure
1. The phone screen displays the emergency caller name and extension.
2. Press OK.
3. The phone screen displays the details of emergency caller. If there is a new crisis alert while you are viewing the details of the current alert, then the phone plays the alert tone again. To view the new crisis alert details, press Back.

Emergency caller information

The Phone screen displays the following details of emergency caller:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extension</td>
<td>The emergency caller extension.</td>
</tr>
<tr>
<td>The following fields will display details only if Avaya Aura Communication Manager has these information.</td>
<td></td>
</tr>
<tr>
<td>User name</td>
<td>The emergency caller name.</td>
</tr>
<tr>
<td>Date</td>
<td>The crisis occurrence date.</td>
</tr>
<tr>
<td>Time</td>
<td>The crisis occurrence time.</td>
</tr>
<tr>
<td>Zone</td>
<td>The crisis occurrence zone.</td>
</tr>
<tr>
<td>Crisis user room</td>
<td>The emergency call origination room.</td>
</tr>
<tr>
<td>Crisis user floor</td>
<td>The emergency call origination floor.</td>
</tr>
<tr>
<td>Crisis user building</td>
<td>The emergency call origination building.</td>
</tr>
</tbody>
</table>

Stopping the crisis alert

About this task
Use this procedure to stop the following types of crisis alerts.

Before you begin
Ensure you are one of the crisis alert watcher.

Procedure
- Crisis alert view: Press OK soft key.
- Audio alert: Press OK soft key if you are in the crisis alert view, else press the crisis alert feature Line key.

Reacknowledging the crisis alert

About this task
Whenever the server rejects the acknowledgement of crisis alert, an error message displays on the phone while the alert tone continues to play. You can reacknowledge the alert by using this procedure.

Before you begin
Ensure that your system administrator designates you as a crisis alert watcher.
Procedure

1. Press the **Main menu**.
2. Scroll to **Features**, and press **Select**.
3. Scroll to **Crisis Alert**, and press **Select**.
4. The Phone screen displays the details of emergency caller.
   
   If there is a new crisis alert while you are viewing the details of the current alert, then the phone plays the alert tone again. To view the new crisis alert details, press **Back**.

---

**Call Forwarding**

The phone supports the following Call Forward types:

- Call Forward: Diverts all incoming calls to another number.
- Call Forward Busy: Diverts incoming calls to another number if you are on a call.
- Call Forward No Answer: Diverts incoming calls to another number when you do not answer the call within a stipulated time.

**Enhanced Call Forward**

The Enhanced Call Forward feature is used to set rules on call forwarding. You can set the rules by entering the internal and external phone numbers in the corresponding call forward types.

**Forwarding a call to another extension**

**About this task**

Use this procedure to forward incoming calls to a specified number.

In the IP Office environment, this feature is supported using short code dialing. Contact your system administrator for the list of short codes.

**Before you begin**

Ensure that the feature is activated by your administrator.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Features**, and press **Select**.
3. To enable Call Forward feature, scroll to one of the following options:
   
   - **Call Fwd**
   - **Call Forward-Busy**
   - **Call Forward-No Answer**
4. Press **Select**.
5. In the **Destination** field, enter the number where you want to forward the incoming calls.
6. Press **Save**.
   The phone generates a confirmation tone and returns to the Features screen.
7. To disable any of the Call Forward features, go to the respective screen and press **Select**.

### Setting enhanced call forwarding

**About this task**

You can use this feature to forward the incoming calls on your phone to various destination numbers based on the call type and call state.

**Before you begin**

Ensure the feature is activated by the administrator.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Features**, and press **Select**.
3. Scroll to **Enhanced Call Forward**, and press **Select**.
4. Select the required rules from the following list, and enter the corresponding numbers.
   - **Forward all calls**:
     - Internal [Enter Number]
     - External [Enter Number]
   - **Forward when busy**:
     - Internal [Enter Number]
     - External [Enter Number]
   - **Forward when no answer**:
     - Internal [Enter Number]
     - External [Enter Number]

   If you have configured a number for any of the rules, the phone displays that number instead of the text **Enter Number**.
5. Press **Save**.

### Editing a rule for enhanced call forwarding

**Before you begin**

Ensure that the Enhanced Call Forward feature is activated by your administrator.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Features**, and press **Select**.
3. Scroll to Enhanced Call Forward, and press Select.
4. Select the rule that you want to edit and press Edit.
5. Enter the destination number.
6. Press Save.

Turning off rules for enhanced call forwarding

Before you begin
Ensure that the Enhanced Call Forward feature is activated by your administrator.

Procedure
1. Press Main menu.
2. Scroll to Features, and press Select.
3. Scroll to Enhanced Call Forward, and press Select.
4. Do one of the following:
   • To turn off a rule, select the rule, and press Turn off.
   • To turn off all rules, press All off.
5. Press Save.

Long-term acoustic exposure protection

Avaya J100 Series IP Phones have the long-term acoustic exposure protection, to protect the ears of the users from the acoustic shocks. This feature reduces the loud volume of the conversations on the phone call to permissible acoustic limits. The user can set the permissible acoustic limit to dynamic or predefined static values. In a dynamic setting, the feature activates itself and gradually reduces the loud volume of the phone conversations to prevent from reaching the damaging decibel levels.

Long-term acoustic exposure protection feature satisfies OSHA, ETSI and employee health safety requirements.

Important:
Only L100 Series Headsets with RJ9 connector supports long-term acoustic exposure protection, when the headset profile is set to Profile1.

Configuring Long term acoustic exposure protection

About this task
Use this procedure to configure the long-term acoustic exposure protection for your headset.

Before you begin
Ensure you set the headset profile to Profile1, and use L100 Series Headsets.
Procedure

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Audio**, and press **Select**.
4. Scroll to **Long term acoustic exposure protection**, and press **Select**.
5. Choose one of the following and press **Select**:
   - **Default**
   - **Off**
   - **Dynamic**
   - **4 hours**
   - **8 hours**
6. Press **Save**.

---

**Call Pickup**

With the Call Pickup feature, you can answer an incoming call on behalf of your pickup group member. The administrator must add you to a call pickup group extension, so that you can redirect an incoming call of your group member to your phone. If the Call Pickup feature is active on your phone, your call appearance will display an incoming call of your group member to your phone.

Avaya J100 Series IP Phones support three ways of call pickup in Avaya Aura® Communication Manager.

- **Call Pickup**: Allows you to pickup call on behalf of a member in a same call pickup group.
- **Call Pickup Extended**: Allows you to answer a call of other pickup group by dialing the extension number of that pickup group.
- **Call Pickup Directed**: You can receive an incoming call of a member of another pickup group by dialing in the extension number of the ringing phone.

You can pick up incoming calls of another group by dialing the appropriate call pickup group number. To pick up calls in a group that is associated with your own group, ensure this feature is activated on your phone by the administrator.

When Call Pickup is enabled, the Avaya Aura® Communication Manager automatically searches for the incoming call in the associated groups to make the call connection.

**Answering a call for a call pickup group member**

**Before you begin**

Ensure that the feature is activated by the administrator.
Procedure

1. Press **Main menu**, and scroll to **Features**.
2. Press **Select**.
3. Scroll to **Call Pickup**, and press **Select**.
4. Do one of the following:
   - Lift the handset.
   - Press **Answer**.
   - Press **OK**.
   - Press **Speaker**.

Answering a call in the same call pickup group

Before you begin
Ensure that the feature is activated by the administrator.

Procedure

1. Press **Main menu**, and scroll to **Features**.
2. Press **Select**.
3. Scroll to **Call pickup extended**, and press **Select**.
4. To answer a call in the same pickup group, enter the extension number of the ringing phone.
5. Press **Enter**.

Answering a call using extension number

Before you begin
Ensure that the feature is activated by the administrator.

Procedure

1. Press **Main menu**, and scroll to **Features**.
2. Press **Select**.
3. Scroll to **Call pickup directed**, and press **Select**.
4. To answer a call of another pickup group, dial the extension number of the ringing phone.
5. Press **Enter**.
Limit incoming Calls

With Limit incoming calls feature, you can limit the number of concurrent calls and change the call appearance. When you activate the feature, the multiple call appearance changes to single call appearance and vice versa. During an active LNCC:

- When you are on a call, if you receive another call, the second caller gets a busy tone. If the Busy Station Call Log feature is enabled, this call is logged as a missed call in the call log.
- In the auto dialing mode, when you dial a number, if your phone receives a call, the phone logs this incoming call as a missed call in the call log.

Activating Limiting incoming calls

About this task

You can activate the Limiting incoming call feature, to limit the number of incoming calls and change multiple call appearance to single call appearance.

Before you begin

Ensure that your administrator has configured the Limiting incoming calls feature for your extension.

Procedure

1. Press the Main menu.
2. Scroll to Features, and press Select.

Result

The Limit incoming calls feature will be activated.

Deactivating Limiting number of incoming calls

About this task

You can deactivate the Limiting incoming call feature, to remove the limit on number of incoming calls and change single call appearance to multiple call appearance.

Procedure

1. Press the Main menu.
2. Scroll to Features, and press Select.

Result

The Limited incoming calls feature will be deactivated.
Interrupting a call with a whisper page

About this task

Use this procedure to make an announcement to a person on another extension who is active on a call. The person who is paged can only hear the announcement.

Before you begin

Ensure that the feature is activated by the administrator.

Procedure

1. Press Main menu, and scroll to Features.
2. Press Select.
4. Enter the extension number that you want to call.
5. Press Enter.
6. Deliver the message when your call is received.

Example

You are on a call with users A, B, and C. You have an urgent message for user A. When you use the Whisper page feature to deliver a message to user A’s extension, all three users hear the tone that signals the page, but only user A hears the message.

Call forwarding to your cell phone using EC500

About this task

Use this procedure to forward calls from your Avaya deskphone to your personal phone.

Before you begin

• Ensure that the feature is activated by your administrator.
• Ensure that the system administrator sets your personal phone number as your destination number.

Procedure

1. Press Main menu, and scroll to Features.
2. Press Select.
Extending a call to your cell phone

About this task
Use this procedure to forward an ongoing call to your cell phone by using the EC500 feature. When you answer the extended call on your cell phone, the call remains active on your office phone. Later you can switch back to your office phone to continue the call.

Before you begin
- Ensure that the feature is activated by the administrator.
- Ensure that EC500 is configured on your mobile phone.
- Ensure that your administrator sets your personal phone number as your destination number.

Procedure
1. Press Main menu, and scroll to Features.
2. Press Select.
3. Scroll to Extend Call, and press Select.
4. Press OK.
   You will receive a call on your cell phone to answer the extended call.

Activating Send All Calls

About this task
When Send All Calls (SAC) feature is on, your incoming calls go directly to a predefined coverage number, typically your voice mail. Incoming calls ring once at your extension and then go directly to a number which is set by your system administrator.

You can also turn Send All Calls on or off by using the phone Features list.

⚠️ Note:
Do not enable the SAC feature in case you selected the cover all option for the coverage path. Enabling both features at the same time can cause duplicate entries in the call log.

Procedure
1. Navigate to the Features screen.
2. Scroll to choose Send All Calls.
3. Press Select or OK or the corresponding line button to activate the feature.
Hunt Group Busy

Using the Hunt Group Busy feature, users can opt-in or opt-out of the calls specific to the hunt group. A hunt group is a collection of users who handle similar types of calls. A user can be a part of multiple hunt groups.

The Features screen displays the Hunt Group Busy buttons. Each Hunt Group Busy button corresponds to a specific hunt group. The Hunt Group Busy button label includes a unique four-digit index for each group.

Using Hunt Group Busy

About this task

Use the Hunt Group Busy buttons on the Features screen, to stop or start receiving calls from a particular hunt group.

Procedure

1. To stop receiving calls from a particular hunt group, press the corresponding Hunt Group Busy button.
2. To turn off the Hunt Group Busy feature for a particular hunt group and start receiving calls, press the corresponding Hunt Group Busy button.

Calling in your intercom group

About this task

Use this procedure to call a specific extension or intercom group.

Before you begin

Ensure that the feature is activated by the administrator.

Procedure

1. Press Main menu, and scroll to Features.
2. Press Select.
3. Scroll to Dial Icom, and press Select.
   The intercom group number shows next to the Dial Intercom feature.
4. Press the number that corresponds to the destination extension.
5. Press Enter.

Example

Auto icom 2 3: The first number denotes the intercom group number for the Dial Intercom feature. The next number denotes the extension your administrator has predefined as your automatic intercom destination extension.
Excluding others from bridging on to your call

About this task
Use the Exclusion feature to prevent others who are bridged to your extension from bridging onto a specific call. You can activate exclusion only during an active call.

Before you begin
Ensure that the feature is activated by your administrator.

Procedure
1. Press Main menu, and scroll to Features.
2. Press Select.
3. Scroll to Exclusion, and press one of the following:
   • Select
   • Corresponding line button
When you activate Exclusion during a call, all parties except you and the calling and the called party are dropped from the call.

Blocking your extension from displaying during calls

About this task
You can override the system (default) setting to display your extension on outgoing calls. Use the Calling Party Number Blocking feature to prevent your number from displaying.

Procedure
1. From the Phone screen, access the Features screen.
2. Select CPN Block.
3. Enter the extension number you do not want the called party to see.
4. Press Enter or OK to start calling party number blocking.

Displaying your extension on outgoing calls

About this task
If you used the Calling Party Number (CPN) Block feature to block displaying your extension on the calls you make, you can change it back using CPN Unblock. CPN Unblock allows parties you call see your extension.
Procedure

1. From the Phone screen, access the Features screen.
2. Select **CPN Unblock**.
3. Enter your extension number.
4. Press **Enter** or **OK** to stop calling party number blocking.

---

**Tracing a malicious call**

**About this task**

Use this feature to trace a malicious call. Activating Malicious Call Tracing (MCT Act) alerts a controller to begin call tracing and provide information for reporting this call. This feature is available only if your administrator has set up the phone system to trace and track malicious calls and there is an attendant or controlling user to oversee the trace.

**Procedure**

1. During an active call, access the Features menu.
2. To start a trace, scroll to **Malicious call trace**, and press one of the following:
   - **Select**
   - Corresponding line button

   An alerting tone or flashing LED signifies the trace is active. Hanging up deactivates MCT Act.

**Important:**

Some countries, states, and localities have laws that determine if and under what circumstances you can use Malicious Call Trace. Before using the Malicious Call Trace feature, you must understand and comply with these laws.

---

**Multiple Device Access**

With the Multiple Device Access (MDA) feature, you can register up to 10 SIP devices with the same extension to transfer active calls between devices.

This feature is available only in an Avaya Aura® environment. Multiple Device Access is configured on Avaya Aura® Session Manager.

**MDA limitations**

The limitations for Multiple Device Access are the following:

- There is no audio or visual alerting for the third incoming call if two call appearances are already in use.
- When you receive an MDA indication, press the **Phone** button to view the details and join the bridged call.
Call recording

With the Audix Record feature, you can record your current call.

⚠️ Important:

Some countries, states, and localities have laws that determine if and under what circumstances you can record telephone conversations. Before using the Audix Record feature, you must understand and comply with these laws.

Recording a call

Before you begin

Ensure that your administrator activated the feature on your phone.

Procedure

1. Press Main menu, and scroll to Features.
2. Press Select.
3. Scroll to Audix Record, and press Select.
4. Disconnect the call to stop recording.

Activating the screen saver

Procedure

1. Press Main menu.
2. Press Applications.
3. Scroll down to Activate screen saver, and press Select.

Call Transfer

With the Call Transfer feature, you can transfer your call to another destination number.

The types of Call Transfer are:

- Consultative transfer: Transferring a call by connecting a call with the transfer recipient.
- Blind transfer: Transferring a call without connecting a call with the transfer recipient.
Making a consultative transfer

About this task
Transfer a call by connecting a call with the transfer recipient.

Procedure
1. While on an active call, press **Transfer**.
   The phone displays the Enter transfer destination screen.
2. Do one of the following:
   • Dial the number to transfer the call.
   • Search for the number in Contacts or Recents.
3. To initiate a consultative transfer, press **Talk**.
   The first call is placed on hold, and the call transfer recipient’s phone starts ringing.
4. Do one of the following:
   • Press **Complete** after the recipient answers the call.
     The call transfer is complete. This is also called attended transfer.
   • Press **Complete** after the recipient’s number starts ringing.
     The call transfer is complete. This is also called unattended transfer.

Making a blind transfer

About this task
Use this procedure to transfer an active call without connecting a call with the transfer recipient.

Procedure
1. While on an active call, press **Transfer**.
   The phone displays the Enter Transfer Destination screen.
2. Do one of the following:
   • Dial the number to which you want to transfer the call.
   • Search for the number in the Contacts or Recents list.
3. To initiate a blind transfer, press **Now**.
   The call-transfer is complete.

No Hold Conference

The No Hold Conference (NHC) feature allows a user to set up a conference call without interrupting the current conversation.
For example, if you press the administered No Hold Conference feature button and then dial an extension the participant that answers the call joins the no hold conference.

If an extension number is pre-configured on SMGR, and you press the No Hold Conference feature button the call is placed to the pre-configured number when the participant answers the call joins the no hold conference.

Using the No Hold Conference feature button you can add more participants to the no hold conference.

If the participants do not answer the call within a prescribed time limit, Avaya J100 Series IP Phones will display an error on the Phone screen.

Adding a participant to no hold conference

About this task
Use this procedure to add participant in to an active call. You can add up to six participant in the no hold conference call.

Before you begin
Ensure that the no hold conference feature is activated by your administrator.

Procedure
1. During an active call, on the Phone screen, press Main menu > Features.
2. Choose No Hold Conference .
3. Do one of the following:
   • If an extension number is pre-configured, you can press Select. The call will be placed to the pre-configured number, when the participant answers the call joins the no hold conference.
   • If the extension number is not pre-configured, you will get a Dial screen to enter the extension number, press OK. When the dialed participant answers the call, a no hold conference is created.
4. To add more participants to the existing no hold conference, repeat Steps 2 and 3.

Using URI dialing to make a call

About this task
Use this procedure to dial an extension with the format username@host where the name of the host includes one of the following:
   • IPv4 address
Before you begin

Ensure that the Edit dialing feature is enabled on your phone.

Procedure

1. Enter the URI extension by using relevant input method for uppercase and lowercase letters, and numbers.
2. Press the Call soft key to make the call.

Busy Indicator

With the Busy Indicator (BI) feature, you can do the following:

- View the status of other users in the network
- Make quick calls to the monitored users
- Transfer calls by pressing the Busy Indicator line key
- Make conference calls with BI users

Note:

This feature is available only in the Avaya Aura® environment.

The icon next to the Busy Indicator line key displays the current status of the monitored user (idle or busy).

The user status is also reflected by the indication of LEDs integrated into the corresponding line keys. See Busy Indicator icons and LED indication on page 60 for more details.

You can relabel and move a Busy Indicator line key from the Phone keys customization menu. See Customizing phone keys on page 80 for more details. However, you cannot add or delete Busy Indicator keys configured on your phone. Contact your system administrator if you want to add more BI line keys or delete the existing ones.

Busy Indicator icons and LED indication

Busy Indicator icons look the same as Presence “Available” and “On a call” icons but they might differ depending on the phone or the button module model.

The following table displays the Busy Indicator icons and LED indication for Avaya J169/J179 IP Phones, JBM24 Button Module, and Avaya J100 Expansion Module.

The icons of Avaya J169 IP Phone and Avaya J179 IP Phone look similar, but Avaya J169 IP Phone has grayscaled icons and Avaya J179 IP Phone has color icons.
Busy Indicator call operations

Making a call to a monitored user

Procedure
Do one of the following:

- On the Phone screen, scroll to the required Busy Indicator line, and press Call.
- Press the required Busy Indicator line key.

Making a conference call with a monitored user

About this task
Use this procedure to add a monitored user to an active call to set up a conference call.

Procedure
1. During an ongoing call, press More > Conf.
   - The phone puts the call on hold, and displays the Select a participant notification.
2. Press the Phone key.
3. Do one of the following:
   - Scroll to the required Busy Indicator line, and press Call.
   - Press the required Busy Indicator line key.
4. When the monitored user answers the call, press Join.

Call Transfer to a monitored user

Ongoing calls can be transferred to a user on the Busy Indicator line. This transfer is managed similarly to Call Transfer to a phone extension.

You can transfer a call immediately (blind transfer) or after making a consultative call to the monitored user (attended transfer). See Call Transfer on page 57 for more details on these transfer types.

Making a blind transfer to a monitored user

About this task
Use this procedure to transfer immediately an active call to a monitored user.

**Procedure**

1. During an active call, press **Transfer**.
2. Do one of the following:
   - Press the Busy Indicator line key corresponding to the user you want to transfer the call to.
   - Press the **Phone** key, scroll to the required Busy Indicator line, and press **Select**.
   
   The phone displays the **Transfer now or talk with [BI extension number]?** window.
3. Press **Now**.
   
   Your call is transferred to the monitored line.

**Making an attended transfer to a monitored user**

**About this task**

Use this procedure to transfer an active call to a monitored user by talking to this user first.

**Procedure**

1. During an active call, press **Transfer**.
2. Do one of the following:
   - Press the Busy Indicator line key corresponding to the user you want to transfer the call to.
   - Press the **Phone** key, scroll to the required Busy Indicator line, and press **Select**.
   
   The phone displays the **Transfer now or talk with [BI extension number]?** window.
3. Press **Talk**.
   
   The current call is placed on hold, and a call to the monitored user is established.
4. To end your consultative call and to transfer the held call, press **Complete**.

---

**Shared control**

With the shared control feature, you can operate phones from the Avaya Equinox® client and use high quality audio of the phone. Shared control is supported on all Avaya J100 Series IP Phones models.

Phones must be registered with Avaya Aura® to establish a shared control connection. When you log in to your phone and Avaya Equinox® in the shared control mode, you can control the phone through Avaya Equinox®. A shared control session might not be established if multiple devices are registered to the same user, depending on the client implementation.

The shared control feature must be activated by the phone administrator and configured on Avaya Equinox®.
This feature is available only in Avaya Aura® environment.

You can perform the following tasks on the Avaya J100 Series IP Phones:

- make a call
- answer a call
- place and resume a call on hold
- mute and unmute a call
- call transfer
- conference

Notifications:

You will get the following messages on your phone screen after the phone is configured or disconnected from Avaya Equinox®:

- Shared Control is active
- Shared Control is inactive

For information on installing and configuring Avaya Equinox®, see Planning for and Administering Avaya Equinox® for Android, iOS, Mac, and Windows and Using Avaya Equinox® for Android, iOS, Mac, and Windows.

---

**WML browser**

Wireless Markup Language (WML) is an XML-based markup language used by Avaya J100 Series IP Phones.

The WML browser feature allows you to view WML web pages.

With the WML browser feature, you can access the Home page, Click to Dial and Add to Contacts applications.

All WML browser elements are designed by the system administrator. Contact your system administrator if you want to change the pre-configured layout.

**Accessing the WML browser**

**About this task**

Use this procedure to access the pre-configured WML browser on your phone.

**Before you begin**

Ensure the system administrator has configured the Browser application.

**Procedure**

1. Press Main menu.
2. Scroll to Applications, and press Select.
3. Scroll to **Browser**, and press **Select**.

4. Use the following controls to access the Browser application elements:
   a. **Up** and **Down** navigation arrows to scroll the Home page up or down
   b. **Left** and **Right** navigation arrows to navigate the history
   c. **OK** button to go to a page link or select an option
   d. **Home** to go to the Home page
   e. **Refresh** to reload the current card
   f. **Exit** to return to the Applications menu

---

**Team Button**

When the administrator configures the Team Button feature for your phone, you can do the following:

- Monitor another phone to know whether calls are redirected to another phone.
- Monitor another phone to know whether that phone has an active call.
- Answer calls that ring on the monitored phone.

Use the Team Button soft key to:

- Make a speed dial call to the monitored phone. You can do this when the monitored phone is not in use.
- Transfer an active call to the monitored phone.

The call redirection feature, Send All Calls, Call Forward, or ECF, might be active on the monitored phone. The monitoring phone can override call redirection when speed dialing or transferring an active call to the monitored phone. The override feature ensures that the call made to the monitored phone rings on the monitored phone and is not routed to the redirected number.

To override call redirection, the administrator must configure on Avaya Aura® Session Manager:

- The monitored phone setting that enables the monitoring phone to override call redirection directly or through a choice provided to the user.
- The monitoring phone setting that enables the phone to override the call redirection feature that is active on a monitored phone.

For more information to set the overriding permission on Avaya Aura® Session Manager, see *Administering Avaya Aura® System Manager*.

The following table shows different icons of the Team Button feature:

**Answering an active call on a monitored extension**

**Procedure**
1. Go to the Features screen.
2. Scroll to choose the monitored extension for which you want to answer the incoming call.
3. Press *Select*.

**Viewing the status of monitored stations**

**Procedure**
1. Go to the Features screen.
2. Scroll to view the status of the required monitored extension.
The Team button screen remains active until you close the screen.

**Speed dialing to a monitored extension**

**Before you begin**
Ensure that the monitored phone to which you make the call is in an idle state.

**About this task**
Use this task to make a call to a monitored phone. If the monitored phone has an active call redirection feature and you can override the feature, the monitored phone rings for 30 seconds. If no one answers the call during this time, the system redirects the call to the redirected number.

**Procedure**
1. Go to the Features screen.
2. Scroll to choose the monitored phone that you want to call.
3. Press **Select** twice.
   The phone makes a call to the monitored extension.

**Transferring a call to a monitored phone**

**About this task**
Use this procedure to transfer an active call to a monitored phone.

**Before you begin**
You must be on an active call.

**Procedure**
1. Go to the Features screen.
2. Scroll to choose the monitored phone to which you want to transfer the active call, and press **Select**.
   The system puts the active call on hold and rings the monitored phone.
3. To complete the transfer, perform one of the following actions:
   - Press the **Complete** soft key.
   - On-hook the handset.
   - Press the **Speaker** button.

**Monitoring other extensions at a glance**

**About this task**
Use this procedure to monitor phones for others. You can see whether an extension is idle or busy at a glance.
Before you begin
Ensure that the feature is activated by the administrator.

Procedure
1. From the Phone screen, scroll to the System Numbers.
2. If necessary, scroll to the line button for the extension you want to check.
3. If that extension is in use, the phone displays Busy next to the extension number.

Active call shortcut keys
With Active call shortcut keys, you can use Autodial and Contacts keys as shortcuts during an active call to perform the required action.

The following actions can be performed by pressing these keys:
• Transferring an active call to the selected user immediately or after talking to this user first
• Adding the selected user to an active call to set up a conference call
To configure any of these shortcut actions, contact your system administrator.

Making a call transfer with a shortcut key
About this task
Use this procedure to transfer an active call to another user using an Autodial key or a contact as shortcuts.

Note:
The actual key used for a shortcut action depends on the current configuration.

Depending on the configuration set by the system administrator, the phone might make a blind transfer or an attended transfer immediately after the Transfer soft key is pressed. Contact your system administrator for more details.

Before you begin
Ensure the following:
• If the configured shortcut is a BLF key, the required user is idle.
• The administrator has set the shortcut action for the key as call transfer.

Procedure
1. While on an active call, depending on the configuration, do one of the following on the Phone screen:
   • Press the Autodial or Contact line key.
   • Scroll to the required Autodial line or contact, and press Transfer.

The phone displays the Transfer now or talk with [BLF user extension]? confirmation window.
2. Press one of the following:
   - **Now**: To immediately transfer the call to the selected user.
     The phone displays the Incoming Call screen with the extension the call was transferred to until the user answers the call.
   - **Talk**: To place the call on hold, and to talk with the user first.

3. *(Optional)* If the user does not answer the transferred call, press one of the following in the Incoming Call screen:
   - **Pickup**: to answer the call on your phone.
   - **Ignore**: to end the call.

### Making a conference call with a shortcut key

**About this task**

Use this procedure to add an Autodial user or a contact to an active call to set up a conference call.

**Before you begin**

Ensure the following:

- If the configured shortcut is a BLF key, the required user is idle.
- The administrator has set the shortcut action for the key as conference call. Contact your system administrator for more details.

**Procedure**

1. While on an active call, depending on the configuration, do one of the following on the Phone screen:
   - Press the Autodial or Contact line key.
   - Scroll to the required Autodial line or contact, and press **Conf**.
     The phone puts the existing call on hold.
2. When the user answers the call, press **Join**.

### Pre-configuration of keys

With the Pre-configuration of keys feature configured, the Phone screen displays a pre-determined set of phone keys for accessing features, applications or line appearances. Phone extensions for autodialing can be also added and accessed with this feature.

The phone configuration is forced by the system administrator, and you cannot change the mapping or labels of pre-configured keys.

Contact your system administrator if you need to replace, move, or relabel the pre-configured keys.
Precedence call

You can override other calls by making a priority call with precedence. You can manually dial the extension number or select the extension from Contacts or Recents. The precedence level is valid for only one call session. The call precedence levels are:

- FO: Flash Override. Highest precedence.
- FL: Flash.
- IM: Immediate.
- PR: Priority.
- Routine: Lowest precedence. Routine is highlighted on the call session line if no call is made within five minutes.

You can start a precedence call from Bridged Appearance, but not from the Team button.

Making a precedence call by using the Main menu

Procedure

1. Press Main menu.
2. Scroll to Applications, and press Select.
3. Select Call Priority.
4. On the Precedence Selection screen, select the precedence level.
5. Dial the extension from one of the following:
   - Contacts
   - Recents
   - The dial pad

Making a precedence call by using dial plan configuration

About this task

Use this procedure to make a precedence call manually by dialing the extension number.

Before you begin

Ensure that the Dial plan is configured on the Local Session Controller or Enterprise Session Controller with the Feature Access Code (FAC).

Procedure

1. Lift the handset or press one of the following:
   - Speaker
   - Headset
   - Corresponding line button
2. Dial the FAC followed by the extension number.

---

**Bridged Call Appearance**

Bridged Call Appearance is a unique extension number that is shared among multiple users to communicate through a single call appearance. You can make, receive, and join a call on behalf of the owner by using the bridged appearance. The bridged appearance might display the bridge owner’s identity on the receiver’s display screen.

**Making a call on a bridged line**

**About this task**
Use this procedure to make a call on another user’s bridged line.

**Before you begin**
Ensure that the required bridged line is idle.

**Procedure**
1. Press the line key of the bridged number that you want to use.
2. Enter the number by using the dial pad.
   The phone initiates the call when the inter digit timer times out.

**Answering a bridged line call**

**About this task**
When you receive a call from a bridged line, the Phone screen displays the bridge owner’s identity. If you receive more than one bridged call, the Phone screen highlights the recent bridged call.

**Procedure**
1. Do one of the following:
   - Lift the handset.
   - Press Speaker.
   - Press the Answer soft key.
2. **(Optional)** For multiple bridged call appearances, do the following:
   a. Press the line key of the bridged number that you want to answer.
   b. Continue with Step 1.
Joining a call on a bridged line

Procedure

On the phone, do one of the following:

• Press the line button with the active call.
• Select an active bridge line number, and press Bridge.

Presence

With the Presence feature, you can monitor the status of your contacts in real time. The administrator must activate this feature to display presence information on your Phone screen.

You can change your status manually so that other users can see your availability for communication.

Viewing the Presence status of your contacts

Before you begin

• Ensure that the feature is activated by the administrator.
• Set Track Presence option to Yes when you add or edit a contact in the Contacts list.

Procedure

1. Press Contacts.
2. (Optional) To navigate through Main menu, do the following:
   a. Scroll to Applications, and press Select.
   b. Scroll to Contacts, and press Select.
3. Scroll to the required contact.

   The phone displays the corresponding Presence icon of the contact.

Related links

Adding a new contact on page 31

Changing your Presence status

Before you begin

Ensure that the feature is activated by the administrator.

Procedure

1. Press Main menu.
2. Scroll to Applications, and press Select.
4. (Optional) Scroll to Automatic.
5. Scroll and press **Select** to choose one of the following:
   - **Available**
   - **Busy**
   - **Away**
   - **Do not Disturb**
   - **Out of Office**
   - **Offline**

6. Press **Save**.

**Calendar**

With the Calendar feature, you can access the Microsoft® Exchange Server calendar on your phone. You can also view and set a reminder for meetings or appointments.

When Exchange Calendar is active, appointments are displayed in the order of their start times and are removed once the meeting time expires. Calendar information is updated whenever you log in to your phone, change calendar settings, or access the Calendar.

**Accessing calendar**

**About this task**

Use this procedure to open calendar on your phone.

**Before you begin**

Ensure that your administrator has activated **Exchange credentials** on your phone.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Applications**, and press **Select**.
3. Scroll down to **Calendar**, and press **Select**.

   If you are accessing calendar for the first time, the phone displays Exchange credentials screen to access your Microsoft® Exchange Server.

**Configuring the Microsoft® Exchange Server calendar**

**Before you begin**

- Ensure that the feature is activated by the administrator.
- Get the following details from your administrator:
  - User name
- Password
- Domain name

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Exchange credentials**, and press **Select**.
5. Type the following details:
   - **Exchange username**: Enter your email ID.
   - **Exchange password**: Enter your password.
   - **Domain name**: Enter the domain name, for example, `avaya.com`.
6. **(Optional)** To enable or disable **Name/Password Prompt**, do one of the following:
   - **Change**: To enable or disable the prompt.
   - The **Right Arrow** key: To enable the prompt.
   - The **Left Arrow** key: To disable the prompt.
7. Press **Save**.

**Reviewing your Calendar event**

**About this task**

Use this procedure to view your calendar appointments. You can set the **Enable Exchange Calendar** and **Enable Reminder** option to **Yes** to get a pop-up reminder of your upcoming calendar appointments.

**Before you begin**

Ensure Microsoft® Exchange is configured on your phone.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Applications**, and press **Select**.
3. Scroll to **Calendar**, and press **Select**.
   
   The phone displays the appointments in the start-time order.
4. To scroll from one appointment to another, press one of the following:
   - The **Up Arrow** key.
   - The **Down Arrow** key.
5. Select the calendar event, and press one of the following:
   - **Call**: To call the extension number available in the appointment.
• **Details**: To view the details of the calendar event.
• **Month**: To view the Calendar Event Month screen.
• **Exit**: To exit from the event screen.

6. In the Calendar Event Month screen, press one of the following:
   • **Today**: To view calendar event of the current date.
   • **Day**: To view calendar event of the selected day.

### Using a Guest Login

**About this task**
Use this procedure to log in as a guest on another phone to access your applications and call history for a limited time.

**Before you begin**
Ensure that the feature is activated by the administrator.

**Procedure**
1. Press **Main menu**.
2. Scroll to **Applications**, and press **Select**.
3. Scroll to **Guest login**, and press **Select**.
4. Enter your extension and password.
5. Press one of the following to set the duration in hours:
   • **Right** arrow key: To increase the value.
   • **Left** arrow key: To decrease the value.
6. Press **Enter**.

### SLA Mon™

SLA Mon™ technology is a patented Avaya technology embedded in Avaya products to facilitate advanced diagnostics. The phones support SLA Mon™ agent which works with Avaya Diagnostic
Server (ADS). SLA Mon™ server controls the SLA Mon™ agents to execute advanced diagnostic functions, such as:

• Endpoint Diagnostics
  - The ability to remotely control IP phones, to assist end users with IP phone configuration and troubleshooting.
  - The ability to remotely generate single and bulk test calls between IP phones.
  - The ability to remotely execute limited packet captures on IP phones to troubleshoot and diagnose IP phone network traffic.

• Network Monitoring
  - The ability to monitor multiple network segments for performance in terms of packet loss, jitter, and delay.
  - The ability to monitor hop-by-hop QoS markings for voice and video traffic.
Chapter 7: Customization

Phone

Setting the dialing mode

About this task
Use this procedure to set the dialing method used to initiate dialing.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Phone, and press Select.
4. Scroll to Dialing mode.
5. Press Change and select one of the following options:
   • Manual: Press the Call soft key to start a call.
   • Auto: Ensure that the dialed digits match the dial plan to start a call.
6. Press Save.

Related links

Displaying call timers

About this task
Use this procedure to display the duration of calls.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Phone, and press Select.
4. Use the **Down Arrow** key to go to the **Display call timers**.
5. Press **Change** to activate or deactivate the call timers.
6. Press **Save**.

---

### Setting key repeat delay

**Before you begin**

Ensure that the key repeat delay settings are activated by your administrator.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Scroll to **Key repeat delay**.
5. Press **Change** to select one of the following:
   - Default
   - Long
   - Longest
   - Off
   - Short
6. Press **Save**.

---

### Setting redial options

**About this task**

Use this procedure to see the last dialed numbers.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Scroll to the **Redial** option.
5. Press **Change**, and select one of the following:
   - **One Number**: To see the last dialed number.
   - **List**: To see a list of the last eight numbers.
6. Press **Save**.

### Assigning speed dial entries

**About this task**

Use this procedure to assign speed dial numbers to your contacts. You can assign up to nine speed dial entries.

This feature is only available in the Avaya Aura® environment.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Select **Assign Speed Dial entries**.
5. Use the **Up** and **Down Arrow** keys to select a speed dial number.
6. Press **Contacts** to select a contact.
7. Press **Select** to assign the contact to the selected speed dial number.

You can assign only one contact.

**Related links**

- [Making a call by using speed dial](#) on page 27

### Replacing and clearing a Speed Dial contact

**About this task**

Use this procedure to replace or remove a Speed Dial contact.

**Before you begin**

Assign a contact to a Speed Dial number.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Select **Assign speed dial entries**.
5. Use the **Down Arrow** key to go to the Speed Dial contact that you want to replace or clear.
6. Press one of the following:
   • **Replace**: To replace the contact with another contact.
   • **Clear**: To remove the contact from the Speed Dial.

7. Press **Replace** or **Clear** when the phone prompts for confirmation.

---

**Setting Mute alert**

**About this task**

Use this procedure to receive a notification alert when your phone is on mute and you try to answer a call.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Scroll to **Mute alerting** option.
5. Press **Change** to select one of the following:
   • **Audible**: The phone beeps to notify that you have muted your phone.
   • **Visual**: The phone displays the mute icon after some time on the phone status line.
   • **Both**: The phone beeps and displays a mute alert message.
   • **None**: The phone disables the mute alert.
6. Press **Save**.

---

**Visual alerting**

The beacon LED works in the following manner to indicate incoming calls and messages:

• If there is an incoming call, the beacon LED blinks.
• If there are new voice mail messages, the beacon LED is lit continuously.
• If the speaker is on during an active call and there are new voice mail messages, the beacon LED turns off every 15 seconds.

⚠️ **Note:**

If the call is on hold, the beacon LED stops flashing.

Customizing phone keys

About this task
Use this procedure to add, relabel, move, or delete contacts, features, or applications from the Phone screen.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Phone, and press Select.
4. Scroll to Phone keys customization, and press Select.
5. Press Customize key.
6. Use Navigation keys to select the line key.
7. (Optional) If the selected line is empty, press Add, and do the following:
   • To add a contact, press Contacts.
   • To add a feature, press Feature.
   • To add an application, press App.
   You can use the Navigation keys to scroll to the required functionality, and press Select.
8. To move the selected line key, do the following:
   a. Press Move.
   b. Use the Navigation keys to move the selected line.
c. (Optional) If the new location is empty, press **Select**.
d. (Optional) If the new location is already assigned a key, press **Swap**.

9. To set a new label, do the following:
   a. Press **Relabel**.
   b. Type the name of the label, and press **Save**.

10. To delete a key, press **Delete**, and then confirm the deletion.

---

**Restoring customized keys to default**

**About this task**

Use this procedure to restore the customized keys to administrator settings.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Phone**, and press **Select**.
4. Scroll to **Phone keys customization**, and press **Select**.
5. Scroll to **Restore**, and press **Select**.
6. In the confirmation window, press **Restore**.

---

**Applications**

**Enabling the Away timer**

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll down to **Presence Integration**, and press **Select**.
5. Scroll down to **Away timer**, and press **Change** to turn on the timer.
6. Press **Change** to turn on the timer.
7. Use the **Down Arrow** key to go to **Away timer value**.
8. Enter the time in seconds.
   You can enter any value from 0 to 999.
9. Press **Save**.

---

### Turning call history on and off

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Recents**, and press **Select**.
5. Scroll to **Log calls**, and press one of the following:
   - **Change**: To toggle call history on or off.
   - **Right Arrow** key: To turn on call history.
   - **Left Arrow** key: To turn off call history.
6. Press **Save**.

---

### Enabling and disabling Microsoft® Exchange contact synchronization

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Contacts**, and press **Select**.
5. Scroll to **Enable exchange contacts**, and press one of the following:
   - **Change**: To enable or disable Exchange contact.
   - **Right Arrow** key: To enable Exchange contact.
   - **Left Arrow** key: To disable Exchange contact.
6. Press **Save**.
**Calendar settings**

**Enabling and disabling Exchange calendar**

Procedure

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Calendar**, and press **Select**.
5. Scroll to **Enable Exchange Calendar**, and press one of the following:
   - **Change**: To enable or disable exchange calendar.
   - **Right Arrow** key: To enable Exchange calendar.
   - **Left Arrow** key: To disable Exchange calendar.
6. Press **Save**.

Enabling and Disabling Calendar reminder tone

Procedure
1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Calendar**, and press **Select**.
5. Scroll to **Reminder tone**, and press one of the following:
   - **Change**: To enable or disable the reminder tone.
   - **Right Arrow** key: To enable the reminder tone.
   - **Left Arrow** key: To disable the reminder tone.
6. Press **Save**.

Setting a reminder and snooze time

Procedure
1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Calendar**, and press **Select**.
5. Scroll to **Reminder Time**, and enter the number of minutes. The range is 0 to 99.
6. Scroll to **Snooze Time**, and enter the number of minutes. The range is 0 to 99.
7. Press **Save**.

Setting a day of the week for calendar reminder

Procedure
1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Applications**, and press **Select**.
4. Scroll to **Calendar**, and press **Select**.
5. Scroll to **First Day of the Week**.
6. Press one of the following:
   - **Change**: To change the day.
   - **Right Arrow** key: To change the day in ascending order.
   - **Left Arrow** key: To change the day in descending order.
7. Press **Save**.
Setting Calendar list

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
4. Scroll to Calendar, and press Select.
5. Scroll down to List Style, and press one of the following:
   - Expanded
   - Compact
6. Press one of the following:
   - Change
   - Right Arrow key
   - Left Arrow key
7. Press Save.

Activating Do Not Disturb

About this task
Use this procedure to direct incoming calls to a predefined coverage number that is set by the system administrator.

In the IP Office environment, this feature is supported using short code dialing. Contact your system administrator for the list of short codes.

Before you begin
Your system administrator must activate the feature for your extension.

Procedure
1. Press Main menu > Features.
2. Use the Down Arrow key to go to the Do Not Disturb screen.
3. Select Do Not Disturb.

Redirecting calls when Do Not Disturb is active

About this task
When your Presence status is set to Do Not Disturb, use this procedure to redirect calls.
Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
4. Scroll to Presence Integration, and press Select.
5. Scroll to DND invokes SAC.
6. Press Change, and set the value to Yes.
7. Press Save.

Audio

Turning automatic gain control on or off

About this task
Use this procedure to adjust the audio output level to for better quality audio.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Audio, and press Select.
4. Scroll to Automatic Gain Control, and press Select.
5. Select the handset, headset, or speaker for which you want to turn automatic gain control on or off.
6. Press Change to turn automatic gain control on or off.
7. Press Save.

Enabling and disabling Bluetooth

About this task
You can use Bluetooth enabled devices with your phone.

Note:
Avaya J169 IP Phone does not support the Bluetooth feature.
Before you begin

- Ensure the wireless module is installed in your phone.

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
4. Scroll to Bluetooth headset, and press one of the following:
   - Change: To enable or disable Bluetooth.
   - Right Arrow key: To enable Bluetooth.
   - Left Arrow key: To disable Bluetooth.

★ Note:

For some Bluetooth headsets, volume can be adjusted during the first call after rebooting the phone. Toggle the slider of the pop-up panel to the right to increase the volume, and to the left to decrease it.

---

Pairing a Bluetooth enabled headset with your phone

About this task

You can pair a maximum of ten Bluetooth enabled headsets with the phone, but you can use only one headset at a time. The phone displays the list of available devices and paired devices.

Before you begin

- Ensure the wireless module is installed in your phone.
- Ensure that the feature is activated by the administrator.
- Ensure your Bluetooth headset is in pairing mode.

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
4. Scroll to Devices, and press Select.
   - The phone scans and displays the list of Bluetooth enabled devices.
5. To scan devices, press Scan.
6. To pair a device, scroll to the headset, and press Connect.
7. To unpair and disconnect a paired headset, under Paired devices, press Unpair > Disconnect.
Turning button clicks on and off

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Audio**, and press **Select**.
4. Use the **Down Arrow** key to go to the Button Clicks screen.
5. Press **Change** to turn the audio on or off.
6. Press **Save**.

Turning error tones on and off

**About this task**

Use this procedure to activate the error tone alarm when you perform an incorrect action while using the phone.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Audio**, and press **Select**.
4. Use the **Down Arrow** key to go to the Error Tones screen.
5. Press **Change** to turn error tones on or off.
6. Press **Save**.

Enabling wireless headset bidirectional signaling

**Before you begin**

Check if the headset supports electronic hook switch (EHS) signaling.

**Note:**

**Headset Signaling** setting is used to configure only DECT headsets and cannot be applied to Bluetooth headsets.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to Audio, and press Select.
4. Scroll to Headset Signaling, and press Select.
5. Press Change to select one of the following options:
   • Disabled: Disables signaling from the phone to the headset.
   • Switchhook and Alert: Activates the link to the headset if you press Headset. When the phone receives an incoming call, you hear the alert tone in the headset.
   • Switchhook only: Activates the link to the headset if you press Headset. When the phone receives an incoming call, you do not hear the alert tone in the headset.
6. Press Save.

Setting headset mic level

About this task
Use this procedure to adjust the best headset performance.

Before you begin
• Ensure that you are on a call and the caller’s audio level is at 50%.
• Adjust the microphone position as recommended by your headset vendor.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Audio, and press Select.
4. Scroll to Headset mic level, and press Select.
5. Press one of the following:
   • Right arrow key: To increase the gain level.
   • Left arrow key: To decrease the gain level.
6. (Optional) To set the default gain level, press Default.

Configuring hearing aid compatibility

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Audio, and press Select.
4. Scroll to Handset profile, and press Select.
5. Press one of the following:
   • Default
   • Normal
   • Amplified: Magnifies the normal audio level. The option must be used with caution because long term extended use of the highest volume settings can cause ear damage.
     
     ![Note:]
     
     The amplified audio level will return to normal when the call is ended.
   • Hearing Aid: Optimizes the sound quality of hearing aids.

6. Press Save.

### Setting a headset profile

**About this task**

Use the procedure to select the headset profile that best matches the acoustic properties of the headset.

**Note:**

Headset profiles 6, 7, and 8 are designed to work only with wireless headsets.

**Procedure**

1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Audio, and press Select.
4. Scroll to Headset profile, and press Select.
5. Scroll to the profile that matches your headset.
6. Press Change.
7. Press Save.

   - **Select**
   - **OK**
Setting the screen saver details

About this task
Use this procedure to change the time that elapses before the phone displays a screen saver and to enable clock display on the screen saver.

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Display, and press Select.
4. Scroll to Screen saver details, and press Select.
5. To change the screen saver time, scroll down to Screen saver timer, and do one of the following:
   You can enter any value from 0 to 999.
   • Press (+) soft key to increase the minutes value.
   • Press (-) soft key to decrease the minutes value.
6. To enable clock on the screen saver, scroll to Clock, and press Change.
7. Press Select.

Adjusting the brightness of a phone screen

Procedure
1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Display, and press Select.
4. Scroll to Brightness.
5. Press Select.
   The phone displays the following list:
   • Phone
     • Name of the button module attached to the phone.
6. On Phone, press one of the following:
   • Right Arrow key: To increase the brightness.
   • Left Arrow key: To decrease the brightness.
7. Press Save.
Setting the display language

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Display, and press Select.
5. Scroll to the language, and press Select.
6. Press one of the following when the phone prompts for confirmation:
   • Confirm
   • Cancel

   The phone returns to the Display screen and the language changes to the selected language.

Setting the backlight timer

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Display, and press Select.
4. Scroll to Backlight timer, and enter the number of minutes. The range is 0 to 999.
5. Press Save.

Setting the time format

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
3. Scroll to Display, and press Select.
4. Use the Down Arrow key to go to the Time Format screen.
5. Press Change to select one of the following options:
   • Time Format 24 Hour
   • Time Format 12 Hour
6. Press **Save**.

---

### Setting the date format

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Display**, and press **Select**.
4. Use the **Down Arrow** key to go to the Date Format screen.
   
   The phone displays one of the following:
   
   • Default
   • mm/dd
   • dd/mm
   • mm.dd
   • dd.mm
   • mm-dd
   • dd-mm
   • mmm dd
5. Press **Change** to select one of the options.
6. Press **Save**.

---

### Setting the time zone

**About this task**

Use this procedure to set the current time of the phone.

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Display**, and press **Select**.
4. Select **Time Zone** to go to the My time screen.
5. To set the required time, do one of the following:
   
   • Use the **Left Arrow** and **Right Arrow** key.
   • Press - or + soft key.
6. Press **Save**.

### Setting the text size

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Display**, and press **Select**.
4. Scroll down to **Text size**, and press **Select**.
5. Press one of the following:
   - **Right** arrow key: To increase the font size.
   - **Left** arrow key: To decrease the font size.
6. **(Optional)** Press **Default** to restore the default font size.
7. Press **Save**.

### Setting the phone screen width

**Procedure**

1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Display**, and press **Select**.
4. Scroll to **Phone Screen width**, and press **Select**.
5. Press **Change** to select one of the following options:
   - **Full**: Each call appearance or feature occupies the entire width of a line.
   - **Half**: Each call appearance or feature occupies half the width of a line, effectively splitting the screen in two halves.
6. Press **Save**.

### Setting the network mode

**About this task**

To set the network mode to **Ethernet** or **Wi-Fi**. You do not need to perform this procedure if your phone is configured to connect to Ethernet or a specific Wi-Fi network.
**Note:**
Avaya J169 IP Phone does not support the Wi-Fi feature.

**Before you begin**
Ensure that the system administrator gave you access to perform this task.

**Procedure**
1. Press **Main menu**.
2. Scroll to **Settings**, and press **Select**.
3. Scroll to **Network**, and press **Select**.
4. Scroll to **Network mode**.
   The **Network mode** setting shows the following options:
   • **Ethernet**: To connect to an Ethernet network.
   • **Wi-Fi**: To connect phone to a Wi-Fi network.
5. Press one of the following:
   • **Toggle**
   • **Right** arrow key
   • **Left** arrow key
6. When **Network mode** displays **Wi-Fi**, the following lines are shown on the Phone screen:
   • **SSID**: The name of the Wi-Fi network that the phone is either currently connected to, or will attempt to connect to if you start the connection process.
   • **Wi-Fi network**: Scroll to this line and press **Select** to view the list of Wi-Fi networks.
7. After selecting the network mode, press **Save**.
8. When you switch **Network mode** from **Ethernet** to **Wi-Fi**, see “Connecting to a Wi-Fi network” section.
9. When you switch **Network mode** from **Wi-Fi** to **Ethernet**, press **Save**.
10. The phone will prompt for permission to restart, press **OK**.
    Press **Cancel** to go back to previous step.

[Connecting to a Wi-Fi network](#) on page 99
Setting the network configuration

About this task

To set the network configuration to Auto or Manual. You do not need to perform this procedure if your phone is configured to connect to Ethernet or a specific Wi-Fi network.

When network configuration is Auto, every time the phone restarts, it will connect to the pre-configured network that your administrator has set up.

When network configuration is Manual, every time the phone restarts, it will connect to the network that you manually configured by Setting the network mode on page 96 or Connecting to a Wi-Fi network on page 99, irrespective of the pre-configured network that your administrator has set up.

⚠️ Note:

Any time you manually change the connected network, the phone will automatically set Network config to Manual.

Procedure

1. Press Main menu.
2. Scroll to Settings, and press Select.
4. Scroll to Network config.

The Network configuration shows following two options:

- **Auto**: To automatically connect a network.
- **Manual**: To manually connect to a network.

5. Press one of the following:
   - **Toggle**
   - **Right** arrow key
   - **Left** arrow key

6. Press one of the following:
   - **Save**
   - **OK**

⚠️ Note:

If you do not want your phone to restart and stay in the Manual mode when you switch Network config from Auto to Manual, press Save.
If you switch **Network config** from **Manual** to **Auto**, press **Save** and then do either of the following:

- If the currently-connected network is the same as the pre-configured network that your administrator has set up, the phone will not restart and stay in the Auto mode.
- If the currently-connected network is not the same as the pre-configured network that your administrator has set up, the phone will prompt you for permission to restart before connecting to the pre-configured network.

### Connecting to a Wi-Fi network

**About this task**

Use this procedure to connect to a Wi-Fi network. You do not need to perform this procedure if your phone is configured to connect to Ethernet or a specific Wi-Fi network.

**Note:**

Avaya J169 IP Phone does not support the Wi-Fi feature.

**Before you begin**

Ensure that the system administrator gave you access to perform this task.

Note the SSID, as this is the name of the Wi-Fi network that the phone will attempt to connect to, see [Setting the network mode](#) on page 96.

**Procedure**

1. Choose your network mode as Wi-Fi, see [Setting the network mode](#) on page 96.
2. When **Network mode** displays Wi-Fi, the following lines are shown on the Phone screen:
   - **SSID**: The name of the Wi-Fi network that the phone is either currently connected to, or will attempt to connect to if you start the connection process.

   **Note:**
   
   If SSID is empty, view the list of Wi-Fi networks.

   - **Wi-Fi network**: Scroll to this line and press **Select** to view the list of Wi-Fi networks.

3. Scroll to the required **Wi-Fi network**, and press **Connect** to start the connection process.
4. Press **OK**, to restart the phone.
5. Enter the following if the security is WEP or WPA/WPA2 PSK:

   - **Password**: The password for the Wi-Fi network.
6. Enter the following if the security is 802.1x EAP:
   • **Identity**: Either your personal user id or the shared user id provided by your administrator.
   • **Anonymous Identity**: Leave blank or use the shared Anonymous Identity provided by your administrator.
   • **Password**: Either your personal password or the shared password provided by your administrator.

**Result**
If the credentials are authenticated successfully, the phone will automatically restart to complete the connection.

**Recording audio parameters**

**About this task**
Use this procedure to record audio parameters information in your phone.

⚠️ **Note:**
The saved audio parameters information is used for audio debugging.

**Procedure**
1. Press **Main menu**.
2. Scroll to **Network information**, and press **Select**.
3. Scroll to **Audio parameters**, and press **Select**.
4. Press the **Record** soft key.
5. To stop the recording, press the **Stop** soft key.
Chapter 8: Troubleshooting

Limited access during failover

One or more telephone system servers provide your phone with its connectivity, features, and functionality. If a disconnect or switch from one server to another occurs, your phone goes into Failover mode to keep it operating while alternate server resources are established. Depending on the server your phone is on, an icon may appear on the Top display line to notify you that failover is in effect.

Failover has different stages. For example, while your phone transitions to a new server it is in “limbo” and functionality may be limited. When the alternate server is active, your phone assumes the functionality available on that server, which may not be the same as your original server. When the original server is restored, your phone transitions back (failback) and functionality may again be limited during the transition. When your phone is back on the original server, normal functionality is restored. Failover and failback are automatic; you have no control over failure mode.

Keep in mind that during failover certain features may not be available and telephone functionality may be limited. Check the soft keys at the bottom of the display to determine the actions you can take during failover. You can also press the Phone button to display the for possible actions.

**Important:**

Do not log your telephone off during failover or until normal service is restored on your original telephone server. Logging off during failover, during transition to or from an alternate server, or while your phone is active on an alternate server may cause your phone to become inoperable.

The following conditions apply when your telephone is in Failover mode:

- If you are on a call when failover occurs, the call will remain active. You cannot initiate new calls while your phone transitions to the alternate server.
- Certain soft keys may not display and their related functions may be unavailable until transition to the alternate server is complete.
- Call connection may take longer than usual.
- During the transition to a new server, any active conference calls, call transfers, and held calls may be dropped. Incoming calls might not reach you and can go to voice mail.
- Emergency calls might or might not work, depending on the stage of failover and the functionality available on the alternate server.
Troubleshooting

- The Message Waiting Indicator is cleared, but voice mail might still be available if the voice mail server to which calls are being sent is not in failover.
- Transitions back to the normal server will restore all original functionality.

Finding documents on the Avaya Support website

Procedure

2. At the top of the screen, type your username and password and click Login.
3. Click Support by Product > Documents.
4. In Enter your Product Here, type the product name and then select the product from the list.
5. In Choose Release, select an appropriate release number.
6. In the Content Type filter, click a document type, or click Select All to see a list of all available documents.
   For example, for user guides, click User Guides in the Content Type filter. The list displays the documents only from the selected category.
7. Click Enter.

Avaya Documentation Portal navigation

Customer documentation for some programs is now available on the Avaya Documentation Portal at https://documentation.avaya.com.

⚠ Important:

For documents that are not available on the Avaya Documentation Portal, click Support on the top menu to open https://support.avaya.com.

Using the Avaya Documentation Portal, you can:

- Search for content in one of the following ways:
  - Type a keyword in the Search field.
  - Type a keyword in Search, and click Filters to search for content by product, release, and document type.
  - Select a product or solution and then select the appropriate document from the list.

- Find a document from the Publications menu.
- Publish a PDF of the current section in a document, the section and its subsections, or the entire document.
• Add content to your collection by using **My Docs** (✩).

Navigate to the **My Content > My Docs** menu, and do any of the following:
- Create, rename, and delete a collection.
- Add content from various documents to a collection.
- Save a PDF of selected content in a collection and download it to your computer.
- Share content in a collection with others through email.
- Receive content that others have shared with you.

• Add yourself as a watcher by using the **Watch** icon (💬).

Navigate to the **My Content > Watch list** menu, and do the following:
- Set how frequently you want to be notified, starting from every day to every 60 days.
- Unwatch selected content, all content in a document, or all content on the Watch list page.

As a watcher, you are notified when content is updated or deleted from a document, or the document is removed from the portal.

• Share a section on social media platforms, such as Facebook, LinkedIn, Twitter, and Google +.

• Send feedback on a section and rate the content.

**Note:**
Some functionality is only available when you log in to the portal. The available functionality depends on the role with which you are logged in.

---

**Viewing Avaya Mentor videos**

Avaya Mentor videos provide technical content on how to install, configure, and troubleshoot Avaya products.

**About this task**
Videos are available on the Avaya Support website, listed under the video document type, and on the Avaya-run channel on YouTube.

**Procedure**
• To find videos on the Avaya Support website, go to [https://support.avaya.com/](https://support.avaya.com/) and do one of the following:
  - In **Search**, type **Avaya Mentor Videos** to see a list of the available videos.
  - In **Search**, type the product name. On the Search Results page, select **Video** in the **Content Type** column on the left.
To find the Avaya Mentor videos on YouTube, go to www.youtube.com/AvayaMentor and do one of the following:

- Enter a key word or key words in the Search Channel to search for a specific product or topic.
- Scroll down Playlists, and click the name of a topic to see the available list of videos posted on the website.

⚠️ Note:

Videos are not available for all products.

---

Support

Go to the Avaya Support website at https://support.avaya.com for the most up-to-date documentation, product notices, and knowledge articles. You can also search for release notes, downloads, and resolutions to issues. Use the online service request system to create a service request. Chat with live agents to get answers to questions, or request an agent to connect you to a support team if an issue requires additional expertise.
